NUTRITIONAL INFORMATION:

Kcal/mL: 1.27

Caloric Distribution (% of kcal)

Protein: 20%

Fat: 48%

Carbohydrate: 30%

Protein Source: 23g/341g

Organic pea protein, organic whole grain brown rice, organic garbanzo beans, organic green peas, organic sprouted quinoa, organic almond butter

NPC:N Ratio: 100:1

Omega-3 to Omega-6 Ratio: 2.6:1

Osmolality (mOsm/kg water): 457

Water: 253g

Meets 100% RDI for 26 essential vitamins and minerals: four 341g pouches*

Fiber Content/Source: 8g/341g

Organic garbanzo beans, organic green peas, organic carrots, organic whole grain brown rice, organic sprouted quinoa, organic sweet potato, organic broccoli, organic kale, organic almond butter

HCPCS Code: B4149

Insurance Data Bank & Billing Codes/NDC Code:**

• **MediSpan:** 57858-00411

• **First Databank:** 57858-0004-11

Viscosity: Nectar-like at room temperature

USER GUIDE :

- Please check with your medical team for an appropriate transition regimen if switching from a commercial enteral formula to Liquid Hope. You may need to transition slowly over the course of 7-10 days to allow the body time to adapt to differences in the formulas.
- Liquid Hope has a 12 hour ambient room temperature hang time.
- Store unopened formula at room temperature for up to 2 years.
- Once opened, the formula can be refrigerated in a sealed container and used within 48 hours.
- Water may be added. If adding water or any liquid, it must be reblended with the product to emulsify in order to prevent separation.
- The formula can be eaten orally. Many enjoy it when heated on the stove and eaten as a soup, or when mixed with fruit and ice to create a smoothie.

** Medicare, Medicaid and health insurers may ask you to provide a National Drug Code / NDC number for insurance claims, billing or reimbursement purposes. Because our products are whole foods and do not constitute "drugs", we have an Insurance Data Bank and Billing Code that you should use when asked for an NDC number for our products.

Special Notes:

*mL range is given due to the volume being affected by viscosity, altitude, and temperature. For the most accurate measurements please use the grams listed. All nutritional information contained herein is calculated using a 341g/per pouch gram weight measurement.

**DRI% is developed by the Institute of Medicine that refers to set levels of nutrients to meet the nutrient requirements for adults 18 and older. We recommend that you follow your physician's or dietitian's recommendations for the volume of formula necessary to meet both your macro and micronutrient requirements.

Liquid Hope undergoes regular nutritional assessment and lab testing. However, as with any real food product, variations in the nutrient levels can vary depending on time of year, soil, and weather conditions. Although we do our best to provide you with the most accurate nutrient information as possible, if you have a medical condition that requires you to be precise with specific nutrient levels, please discuss the use of this product with your medical team.
